EXPERIENCE

ADORSYS | JUNIOR DEVOPS ENGINEER

Remote, Germany | January/2024 – Present

As a Junior DevOps Engineer at Adorsys, I play a key role in automating infrastructure provisioning and configuration management. By leveraging tools like Ansible, I streamlined deployments, achieving a significant time reduction of 60%. Furthermore, I implemented a robust CI/CD pipeline using (ArgoCD, Traefik, kubernetes, Terraform, Docker and much more) to ensure consistent and reliable software releases. My proactive approach to system health monitoring helped identify and resolve potential issues before they impacted production, contributing to a more stable and efficient IT environment.
